**Commonwealth Imaging offers the best of both worlds!**

While we continue to preserve Canada's history with newspaper microfilm, we also offer the best digitizing services possible. Libraries can have it all! They can have their preservation archival microfilm, and their online searchable newspaper and book collections.

**Products and solutions for libraries, institutions and businesses**

Besides microfilming and digitization services, we offer a unique line of products. We continue to offer our products such as the Book Buddy book truck, storage systems, and Canon and ST ViewScan micrographic equipment, while developing new products which libraries, institutions and businesses are in need of.

Poland

### THE POLISH CANADIAN COURIER

(Kurier Polsko-Kanadyjski) was the first private independent Polish newspaper in Canada. Published as a bilingual paper from 1972 to 1986 as The Polish Canadian Courier, it continues today under new ownership as The New Courier (Nowy Kurier)

The Polish Canadian Courier was unique in Canada due to its rich documentation of Polish "communities" throughout the world. To celebrate the 100th Anniversary of Polish settlement in Thunder Bay, Courier carried in-depth articles about the Polish Kaszubian settlers and their descendants as well as an overall

look at Kaszubian culture. In addition this bilingual (English/Polish) publication enjoyed a strong cultural focus on literature, cinema and theatre.

Acclaimed for its excerpts from Slavic, Latin, Germanic publications across Canada and personal interviews with editors from Chinese, Greek and Japanese newspapers. William Markiewicz, Editor and Publisher, was honoured by the multi-lingual ethnic press for his help in promoting the interests of people from a variety of ethnic groups. The President of the American Slavic Institute of New York, Mr. Vladimir Kozak, has praised the Polish Canadian Courier as "the best".

**The Polish Canadian Courier** Dec. 1972 - Nov. 1986

complete set of 4 reels **\$560**

Individual reels **\$145/reel**

## New Canadian

New Canadian	Feb. 1939 - Sept. 27, 2001	73 \$145.00/reel
--------------	----------------------------	---------------------

## The NEW Canadian

**THE NEW CANADIAN** was founded in 1938 by English speaking Japanese students from the University of British Columbia (Vancouver). During WWII the paper was relocated to Kaslo B.C. - one of the infamous internment camps. At this time it became bilingual to accommodate those Japanese who had been interned and whose first language remained Japanese. After WWII the publication moved to Winnipeg for a period of 4 years before relocating to Toronto.

Over the years the paper has been awarded the Order of Canada twice for its outstanding contribution to the welfare of Canadians of Japanese origin.

With the addition of issues from 1993, **THE NEW CANADIAN** is now available from 1939 to 2001. Total collection: 73 Reels.

**The New Canadian Collection** 1939 - Sept. 27, 2001 (as a complete set)

**\$145.00/reel**

Please see page 20 for detailed pricing.

## Montreal Star TORONTO TELEGRAM

### Alberta Scrapbook Hansard

From 1906 to 1964, staff members of the Legislature Library in Edmonton clipped newspaper articles concerning the activities of the Alberta Legislative Assembly and organized them chronologically in scrapbooks. Some of these scrapbooks have become known as the Alberta Scrapbook Hansard. In the past, many students, historians and commercial research persons have had to travel many miles to Edmonton in order to examine this material, but now Alberta Scrapbook Hansard is available to you on microfilm.

*Complete collection (35mm roll)*

20 reels

### Glenbow Collection (The)

A collection of significant publications related to the history and economic development of Alberta. Many rare and invaluable pieces - all available on 35mm microfilm for your library. If interested, please inquire about the complete list of the Glenbow Collection.

### Gospel Herald (The)

The newspaper dates from 1937 which makes it the longest running Church of Christ publication in Canada. It is a study of the growth of religious communities and Christian ideas in North America. This film should be in the hands of the student of the Restoration Movement in Canada. Included with The Gospel Herald is the cumulative index for the years 1969 - 84.

17 reels 1936 - 1993

### Canadian Military Gazette

The Military Gazette was published between the years 1885 and 1948. The Military Gazette was devoted to the interests of the active force of the Dominion of Canada. It aimed to be the recognized medium of instruction and information for the Canada Militia. It is a very important Canadian source for the genealogist and the military researcher.

22 reels 1885 - 1947

### Journals and Appendices of the Parliament of Upper Canada

Journals & Appendices beginning with the First Session of the Ninth Parliament of Upper Canada on January 13, 1825 and running through to the Fifth Session of the Thirteenth Parliament ending on February 10, 1840. These films contain a vast wealth of historical, economic, and biological information relating to all aspects of life in Upper Canada coming under the scrutiny of the House.

9 reels

*Older reels may have inconsistencies, please inquire

# ORDER PLACEMENT AND POLICIES

---

## 1. When ordering, please specify:

- a. Title.
- b. Where published (city and province).
- c. Year(s) desired.
- d. If a subscription, is it to be considered a standing order? Please specify vesicular or silver halide microfilm.
- e. Film polarity - positive or negative?  
Vesicular film (subscriptions only) is positive, while silver halide can be positive or negative.
- f. Complete shipping and billing addresses.
- g. Purchase order number.

## 2. Negative Microfilm Option

Negative microfilm is available as an option in silver halide only. There is a 20% surcharge for negative microfilm.

## 3. Sales Taxes

Customers are subject to GST (5%) and applicable HST. The only exemption is Federal Government.

## 4. Cancellations

Subscription cancellations are only accepted up until Jan. 31 of any subscription year.

## 5. Returns

Since all microfilm orders are custom produced, they may not be returned for credit without prior, written permission.

## 6. Claims Policy

The customer must notify us if reels appear to be missing from a shipment within six months of receipt of that shipment, in order to receive the missing material at no charge.

## 7. Damage Claims

Packages received damaged must be reported within 60 days of delivery. Please contact Commonwealth Imaging and wait for instructions before returning shipments. Retain shipping cartons or containers for inspection.

## 8. Limited Warranty

Legibility of microforms depends on the condition of the physical material when filmed and on the technology in use at the time. Master negatives from which microform copies are produced have been accepted by the owners of the physical originals as being legible and complete to the extent reasonably practical. Extensive efforts are made to achieve continuity and file integrity, but no guarantee against occasional missing or damaged pages or issues is given or implied.

Commonwealth Imaging's obligation and liability in the event of defect as determined by our inspection is limited to the furnishing of free replacement of microform copy, packaging, or labeling, or a refund of the price paid for the defective product, at the option of Commonwealth Imaging. This representation as to condition and warranty constitutes the only representation and warranty

(expressed or implied) made by Commonwealth Imaging.

## 9. Film Type

Backfile orders are produced with silver halide only. Current daily newspapers are available on silver halide or vesicular (non-silver) film.

Concurrent with industry practices, Commonwealth Imaging will film all revisions and changes for all editions unless instructed otherwise by the publisher.

# SILVER HALIDE OR VESICULAR MICROFILM?

**COMMONWEALTH IMAGING** will provide all newspaper backfile orders on silver halide duplicating film. Orders for current annual subscriptions can be supplied on either silver halide or vesicular microfilm depending on the customers' requirements.

## Silver Halide Microfilm

Advantages:

- Archival characteristics for long term storage.
- Produces a crisp, clean image to view or print.
- Provides a positive image, allowing user to view newspapers in their original form.

Disadvantages:

- Not as durable as vesicular film and can scratch easily in high-use libraries.
- Requires some care in handling and storage.

## Vesicular Microfilm

Advantages:

- Good quality viewing characteristics similar to silver halide.
- Some pricing/cost advantage.
- Highly durable, offers excellent working product.
- Offers reasonable working prints.

Disadvantages:

- Not archival. Image may fade over time.

# WHY NEWSPAPERS ON MICROFILM?

## Save money!

Compare the costs of microfilm with the costs of paperbound volumes. You'll find newspapers on microfilm save you valuable budget dollars.

## Save space!

On the average, microfilm takes up to 90% less space than bound volumes.

## Obtain eyewitness accounts of history - today!

With newspapers on microfilm, you can furnish your patrons with news coverage of Canada's (and the world's) most historic events and personalities. These first hand accounts are virtually unobtainable elsewhere.

## Locate information quickly!

Microfilm allows researchers to retrieve research data quickly. Information is easy to find - no more searching through awkward, bound volumes.

## Maintain a durable, permanent resource!

Microfilm stands up to your patrons' usage. Even if the original newspaper were available, its fragile conditions would make it unsuitable for research.

# THE APT BOOKSCAN 2400RA™

---

West Canadian is proud to offer additional solutions to augment its existing document scanning, records management, newspaper archiving and digital printing services in Canada. High-volume digitization requires speed, quality, and the flexibility to work on site or remotely. West Canadian's new Kirtas APT BookScan 2400RA™ provides the highest quality image capture system, most powerful processors, expansive storage and the option for increased productivity through remote access.

## Superior Image Quality

West Canadian's BookScan APT 2400RA™ is equipped with high-quality, digital cameras rather than traditional scanner technology to capture page images. Its two 16.7 mega pixel Canon EOS-1Ds Mark II digital cameras photograph each right and left-hand page simultaneously through the cameras' 24-70mm Zoom EF lenses. Resolution can be set to 300 or 400 pixels per inch, with the ability to interpolate to 600 DPI through BSE software.

## Robotics More Gentle Than the Human Hand

The book rests gently in the patented SmartCradle™ Dynamic Book Handler, which automatically adjusts to compensate for the decreasing number of pages on the right side as they are turned and captured. The SmartCradle™ maintains the book open at exactly 110 degrees throughout the process, providing a low-stress support for rare and fragile books. The SureTurn™ robotic arm reduces the need for manipulating pages by hand, which is most critical in the case of old or fragile bound documents. The computer-controlled arm uses an adjustable vacuum system, in tandem with page fluffers to gently pick up and turn one page at a time.

## Quality Assurance Through Technology

To assure only one page is picked up and none are missed, the APT 2400RA™ is equipped with the Page Edge Sensor, which monitors the APT's performance and adjusts the head's position as needed. The Enhanced Page Separator helps to separate the individual pages while the Page Edge Sensor monitors the page lift to make sure one, and only one page is turned at a time. If a page is missed, or multiple pages are lifted, the APT 2400RA™ will pause and allow the operator to take corrective action.

## Productivity Through Speed and Simplicity

The APT BookScan 2400RA can capture at an amazing 2400 pages per hour, and that's not the only feature designed to increase productivity. The APT Manager—the software that runs the APT system—is highly intuitive.

## Leveraging Metadata

With our new APT BookScan 2400RA™ we have the only solution that integrates metadata into the production process to ensure seamless workflow and inventory control. We simply scan the book's bar code, and the APT Manager searches the selected library database for any descriptive metadata available—including MARC, MARC21, DublinCore, MODS, and other formats—and saves it in the Metadata folder for that particular book. APT Manager and BookScan Editor also produce technical metadata during book scanning and post-processing for authenticity and archival purposes. Where books are going to be reprinted ONIX metadata is included in the metadata folder.

## The APT BookScan 2400RA

The 2400RA includes a high performance Intel Blade server that allows for simultaneous image capture, image processing, quality control, and OCR processing. In addition, the 2400RA is configured to allow for remote access processing, which means while our image technician is digitizing books, other technicians can be using Bookscan Editor software for image processing and quality control. OCR processing can be working on other books, all without the need for moving files from one server to another.

# Book Scanning Service Bureau

Contact Martha Grant for your specific pricing and quotes

Set up

Scanning with post-processing/QC - black & white

Scanning with post-processing/QC - color or grayscale (book covers - color)

Background removal/segmentation (operator's discretion to improve output)

PDF creation without OCR

OCR to PDF/Word/XML

CD/DVD

Hard drive

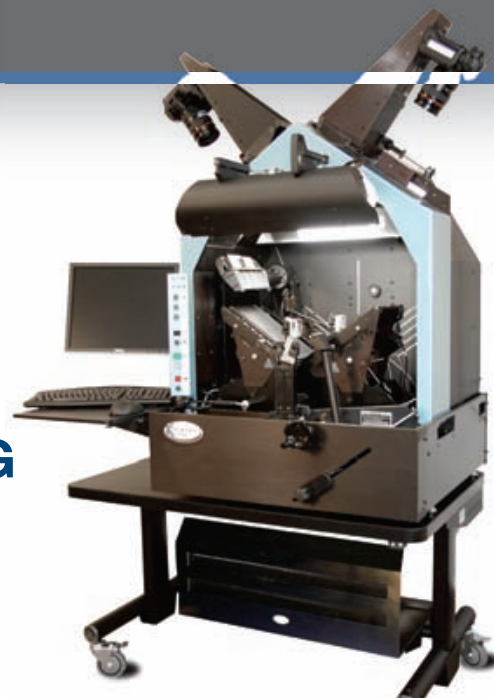

Special handling (if necessary)

Largest size is 11"x14" with a thickness of no more than 5".  
(We can sneak material up to 5.5" but it gets tricky!)

# THE ULTIMATE

## The all new ST ViewScan™

- **ENHANCED VIEWING:** No pixellation when refreshing live viewed images (which can happen with many other scanners).
- **HIGH QUALITY image scanning:** Archival quality, even contrast, sharp text, photo restoration, lossless scaling and more!
- **FULLY INTEGRATED SYSTEM:** ONE power cord, ONE on-off switch, ONE film carrier! View and scan any size roll film, microfiche, opaque micro cards, aperture cards and much more.
- **ENVIRONMENTALLY SOUND:** CE certified, extremely low voltage power consumption, RoHS compliant, and ULTRA COMPACT energy efficient design.

- **INCOMPARABLE capture speed:** (1/6th of a second) at 300 dpi.
- **INTUITIVE WINDOWS Software:** Software included with the ST ViewScan™ is easy to use! A powerful Windows desktop application that is very "user friendly" with no confusing clutter of enigmatic icons.
- **MODULAR design – continued flexibility:** Will not become obsolete, protecting your initial investment.
- **First true MICROFILM CROSSOVER™ PRODUCT:** Combines digital view, digital scan and digital on-screen film controls, with ease of use. Some industry-standard Motorized Combo Roll/Fiche Film Carriers are already compatible, so you can save even more when you move your existing combo carrier to the new ST ViewScan™ digital system.

Use the ST ViewScan™ with . . .

ROLL FILM, 3M FILM CARTRIDGE, MICROFICHE, OPAQUE MICRO CARDS, APERTURE CARDS

# DIGITAL ADVANTAGE...

The all new  
**ST ViewScan™** will revolutionize the way you use  
and access your film archives!

Anything on roll film can now  
be **INSTANTLY** viewed and  
captured from PC to PC . . .  
**ANYWHERE IN THE WORLD!**

- **UNPARALLELED image quality:**  
For on-screen viewing and near  
archival scanning.
- **SHARE FILM LIVE over the internet:**  
Any time, anywhere around the globe!

Here's how it works . . .

The ST ViewScan™ can broadcast a live video feed of microfilm images over the internet to virtually any remote location without needing to scan the pages. A roll of film from the host library's film archive (which may be hundreds or thousands of miles away), is mounted on the ST ViewScan™ and the remote user is given access.

The remote user can then zoom in and out, advance and reverse the film, scan, print and email the pages viewed.

Expand your capabilities . . .

The **ST ViewScan™** is perfect for  
use with **ST Companion Scanner** ▶

- **EASY TO USE** – works seamlessly  
with the **ST ViewScan™**

Add the **ST Companion Scanner** for . .  
**BOOKS, PHOTOS, DOCUMENTS, GLASS FLATS, FILM, COLOR SLIDES, etc.**

# The BOOK<sup>®</sup> BUDDY

SCHOOLS • LIBRARIES • UNIVERSITIES • BUSINESSES

## ERGONOMIC CUSTOMIZABLE DESIGN

The Book Buddy book truck has been designed using the following key features to reduce injury and strain to the user:

- The introduction of a handle for easy maneuverability
- The use of 6 strategically positioned wheels for transport over uneven surfaces
- Customizable shelf selection and positioning based on usage

## MORE THAN 600 LBS OF WEIGHT CAPACITY

The combination of materials used, steel framework, premium quality wheels and bolted joints provides the Book Buddy user with the confidence to load the book truck to capacity with ease. We guarantee each shelf with a minimum weight capacity of 200 lbs. For libraries that wish to use the Book Buddy for exceptional shipping and receiving uses, additional structural revisions can be made to increase the weight capacity even further.
